

ASPIRE

Aspire (IS-PR 489) was developed for broad spectrum disease resistance with emphasis on Grey leaf spot and helminthosporium.

It's a dense dark green variety that has demonstrated superior recovery to drought (2010 PR NTEP) and early spring green-up. Aspire was developed for permanent turf-grass blends and mixtures containing improved perennial ryegrass and other grass species compatible with perennial ryegrass.

Use

- Golf courses
- Home lawns
- Landscaping
- Parks & reserves
- Sports fields

Sowing Rate

30-40 (g/m²)
(20-30 when oversewing)

Benefits

- Dark green colour
- Disease resistance
- Early spring green up
- Excellent turf quality
- Strong drought recovery

Ratings

It is an excellent choice for professional overseeding programmes on tees and fairways either as a straight or in mixes and blends. Aspire is well adapted to the North and South Islands.

All ratings are based on USA trial data.
