

CEZZANE

Cezanne performs very well under close cutting (e.g. golf greens) and performs equally well in cold/temperate regions as it does in hot and dry regions with irrigation.

Good performance continues to be proven in STRI trials where it is top ranking, and from results of official trials in France and Germany. In 2007 Cezanne also joined the ScanTurf and ScanGreen Danish lists.

Use

Golf tees, greens and fairways
Ornamental lawns and shaded areas

Sowing Rate

35-45 (g/m²)
(25-35 when oversowing)

Benefits

Extremely dense
Excellent performance under very close cutting
Medium to dark green colour

Ratings

Close mowing tolerance

Density

Red thread tolerance

Colour

Salt tolerance

Extreme density. The good adaptation to close cutting is partly due to a very high density. Adaptation in hot/dry as well as temperate regions.

All ratings are based on European trial data.
