

# JORVIK

## BROWNTOP BENT

**For high quality prestigious golf greens in New Zealand, more and more people are looking at browntop bentgrass, *Agrostis capillaris*.**

The reason why is cultivars like Jorvik, which compare favourably with the best creeping bentgrasses.

When lower maintenance and pesticide use is of importance, the choice of browntop bent is becoming increasingly more popular. For greens it makes a perfect partner for the new dense varieties of chewing fescue.

### Use

Bowling & croquet greens  
Golf courses  
Home lawns  
Landscaping

### Sowing Rate

15-20 (g/m<sup>2</sup>)  
(5-10 when oversowing)

### Benefits

Fast spring green-up  
Fine textured  
Low inputs  
Uniform green  
Very dense

### Ratings

Density

Fineness of leaves

Salt tolerance

Jorvik is very winter hardy in cold conditions and demonstrates good salt tolerance.

All ratings are based on European trial data.

## Top Ratings in various regions

In recent trials in coastal and central regions of Europe, Jorvik has shown excellent performance and exhibits superior scores for visual merit throughout the year, highest tillering, plant cover, finest leaves and lowest daily regrowth.
