

# PIPOLINA

## MICROCLOVER®

Many years of natural selection have resulted in revolutionary microclovers with all the benefits of traditional clover packed into very tiny leaves.

Pipolina microclover® 'spoon feeds' nitrogen to the grass, producing a healthy, dense and naturally green lawn that is easy to maintain. The vigorous and dense growth of clover and grass together crowds out existing weeds and prevents new weeds from establishing; and the unique dense stolon structure allows it to tolerate exceptionally low mowing heights.

### Use

Blends  
Home lawns  
Landscaping  
Parks & reserves  
Sports fields

### Sowing Rate

2.5-5 (g/m<sup>2</sup>)  
(5% in mixtures)

### Benefits

Crowds out weeds  
Low maintenance  
Naturally green  
Nitrogen enhancement  
Tolerates close mowing

### Ratings

All ratings are based on European trial data.
