

RHIZING MOON

Rhizing Moon (IS-TF 305 SEL) is a superior tall fescue whether for low maintenance, as its A-LIST* qualification shows, or high maintenance. In addition, it can recover from damage by both rhizomes and aggressive tillering.

Under either low or high maintenance, Rhizing Moon demonstrates superior drought tolerance and recovery. Rhizing Moon is a very dark green, fine textured, high density tall fescue with superior performance nationwide. It shows excellent shade tolerance and high performance in full sun. Superior Brown patch, Leaf spot and Pink snow mould resistance increases its low maintenance performance.

Use

- Golf courses
- High traffic conditions
- Parks & reserves
- Sod turf growers

Sowing Rate

35-45 (g/m²)
(25-35 when oversowing)

Benefits

- Dark green colour
- Excellent wear tolerance
- Good disease resistance
- Good drought tolerance
- Very good density

Ratings

All ratings are based on USA trial data.

Adaptation

Rhizing Moon is recommended permanent turf on sports fields, lawns, parks and golf courses. It can be cut from 13 mm – 75 mm and still maintain density and performance. Full sun to shade, Rhizing Moon shows high performance. It can be blended with Kentucky bluegrass and other turf species for superior turf. It is well adapted for overseeding zoysia for a cool season/warm season mixture around the globe.

(* A-LIST means Alliance for Low Input Sustainable Turf, USA)
